Complex Hierarchical Changes Proposal

Proposal Status: WHO ?

Undernutrition based on anthropometric or clinical criteria in adults

Detailed Explanation of the Proposal

This is a concerted action from the global clinical nutrition community. The aim is to provide an ICD-11 proposal for an "adding entity" of "Malnutrition in adults" in order to complement the I gap and meets the requirement of the clinical nutrition community.

The following codes with definitions and post-coordination are proposed:

5B72 Malnutrition in adults
Definition
 When malnutrition is confirmed by the presence of a combination of phenotypic criteria; e.g. weight loss, low body mass index or reduced muscle mass, and etiologic criteria; e.g. reduced disease burden/inflammation.
Post-coordination: XS0T Moderate XS25 Severe

5B72.0 Malnutrition in adults related to acute or chronic disease, injury or infection with moderate to severe inflammation
Definition
 When malnutrition is confirmed by the presence of a combination of phenotypic criteria, e.g. weight loss, low body mass index or reduced muscle mass, and the presence of a high disease burden.
Post-coordination: XS0T Moderate XS25 Severe

5B72.1 Malnutrition in adults related to disease with non-discernible or low level of inflammation
Definition
 When malnutrition is confirmed by the presence of a combination of phenotypic criteria, e.g. weight loss, low body mass index or reduced muscle mass, and the presence of reduced food due to disease as the major etiologic criterion.

5B72.2 Malnutrition in adults related to pure starvation
Definition
 Presence of one of three phenotypic criteria; e.g. weight loss, low body mass index or reduced muscle mass that is related to reduced food intake due to hunger or food shortage associated with a high disease burden.
Post-coordination: XS0T Moderate XS25 Severe

5B72.Y Other specified malnutrition in adults
Post-coordination: XS0T Moderate XS25 Severe

5B72.Z Malnutrition in adults, unspecified
Post-coordination: XS0T Moderate XS25 Severe

Rationale
 Amendment code for malnutrition in ICD-11 - "Malnutrition in adults"
